

# 7 SIGNS YOUR ANGEL GUIDES ARE AROUND YOU

Angels are spiritual beings with a much higher frequency than human beings. They are always around us, and we need only to tune our awareness to connect with them.

Depending on the question that you have asked, or the challenges that you are facing, the messages can come to you in various forms.

Angels understand you, and will try to show you signs that you recognize.

Angels are constantly trying to point out signs that align with our Life path. The moment they feel that we are getting these messages and understanding them, the frequency of the messages and signs increases.

Here are some ways you know the Angels are trying to get your attention:

## 1. FEATHERS:

This is one of the most common ways for the Angels to show their presence, support and love. You may see feathers where no birds exist, you may even see them in a closed room!

I remember a time (way back in my corporate life) that I was very stressed before a large conference, and suddenly I saw a white feather lying next to my laptop. It was so strange, because the room was in a hotel and there were no open windows! The presence of the feather calmed me down and I instantly knew that Angel love surrounded me.

## 2. SCENT OR FRAGRANCE:

You may smell a beautiful fragrance when Angels are around. Do you sometimes smell a chocolatey or flowery smell in a place that you never expected to? Well, that is a sure sign that your Angels are around.

You can also smell the familiar perfume of a loved one who has passed away. For example, if you smell your grandmothers favorite perfume, chances are that her spirit is right with you. Or it could be your grandpa's cigar.

### **3. COINS:**

This is another sign of the Angels demanding your attention. You may find shiny pennies in the most unlikely places. Someone could also be giving you coins. It could be a sign of financial abundance that is just on its way.

#### 4. CLOUDS:

Have you seen and guessed cloud shapes? We all did that as kids. Cloud shapes are the way of Angels showing you messages. Try it today- go and observe the shapes of the clouds, and I am sure that you will get a sign that you are looking for.

Clouds can become Angel shaped, or it could seem like two people are holding hands (message could be union/ romance) or it could be in the shape of a heart and many more.

Ask for guidance on how this answers your questions or how should you interpret it.

#### 5. SONG/ MUSIC:

Familiar tunes will start playing at the station you tune into, and you had just thought of the same song in your mind. Has it happened? It is a sign from the Angels that you are tuned in to their frequency.

You may sometimes hear the same song repeatedly, and that may be an indication that you need to pay attention to the words. The words could be the answer to your challenge or a step in the right direction.

## **6. SPARKLES**

Angels are bright, illuminated and beautiful beings. If you see a sparkling image briefly through the corner of your eye, chances are that you have seen an Angel.

Every Angels has a different colour. Blue is the colour of Archangel Michael, green for Archangel Raphael, purple for Archangel Metatron and the list goes on.

There could be orbs that you see in photographs (Orbs are energetic spheres of light) or in meditation with your eyes closed. These orbs, this light is a clear indication that Angels are near.

## **7. ANGEL NUMBERS:**

Angel numbers are energetic sequences that we see and they are a sign of ascension. It means that you are walking towards your spiritual path.

These numbers are patterns like 1111, 2222, 777 333. Many people see a certain sequence occurring in their lives. They make wake up every night at 2.22am, their grocery bill may be 222, they may see 2222 on the license plate of a car. There is a separate blog on Angel numbers, and you may visit the website for that.

Go on, and have fun with your Angel guides. They are always with us, and we need only increase our awareness with these signs to feel their presence.

Next time you have a question, just ask them to show you a sign. And watch the magic.....

Love,  
Manmeet
